Developer Pages Guide

Generated: 2 Apr 2026

Implementation Guide: Jessica Baillet CV Website — All Sections Beyond Homepage Hero

> Note: This guide assumes the homepage Hero (Section 1) and the global layout scaffolding (HTML boilerplate, CSS variables, font imports, sticky navigation, and language toggle) are already built. All sections below are part of the single-page scrolling architecture.

Table of Contents

1. [Global Shared Components](#global-shared-components)
2. [Navigation Bar](#navigation-bar)
3. [Section 2: About / À Propos](#section-2-about)
4. [Section 3: Experience / Expérience Professionnelle](#section-3-experience)
5. [Section 4: Skills / Compétences](#section-4-skills)
6. [Section 5: Education / Formation](#section-5-education)
7. [Section 6: Testimonials / Recommandations](#section-6-testimonials)
8. [Section 7: Contact](#section-7-contact)
9. [Section 8: Footer](#section-8-footer)
10. [Utility: Language Toggle System](#language-toggle-system)
11. [Utility: Scroll Animations](#scroll-animations)
12. [Utility: PDF Download Handler](#pdf-download)

Global Shared Components

Filename: `css/variables.css`

```css
:root {

}
```

```
/* Tablet */
@media (max-width: 1024px) {
  .about__grid {
    grid-template-columns: 1fr 2fr;
    gap: 48px;
  }

  .about__stats {
    grid-template-columns: repeat(2, 1fr);
  }
}

/* Mobile */
@media (max-width: 768px) {
  .about__grid {
    grid-template-columns: 1fr;
    gap: 24px;
  }

  .about__header {
    position: static;
  }

  .about__intro {
    font-size: 1.125rem;
  }

  .about__stats {
    grid-template-columns: repeat(2, 1fr);
    gap: 24px;
    padding-top: 32px;
  }

  .about__stat-number {
    font-size: 2rem;
  }
}
```

CSS Notes:

- The left column header is `position: sticky` on desktop to keep the section title visible while scrolling through longer content on the right.
- Stats use `border-top` as a subtle separator. Numbers use DM Serif Display to match the heading aesthetic.

JavaScript: Stat numbers should animate (count up) when entering the viewport. See [Scroll Animations](#scroll-animations).

Section 3: Experience / Expérience Professionnelle

Filename: Section within `index.html`

```html
<section class="section" id="experience">

Filename: `js/timeline.js`

```javascript
document.addEventListener('DOMContentLoaded', () => {
  const timelineProgress = document.getElementById('timelineProgress');
  const timelineLine = document.querySelector('.timeline__line');

  if (!timelineProgress || !timelineLine) return;

  const updateTimelineProgress = () => {
    const timelineRect = timelineLine.getBoundingClientRect();
    const windowHeight = window.innerHeight;

    // Calculate how much of the timeline is visible/passed
    const timelineTop = timelineRect.top;
    const timelineHeight = timelineRect.height;

    // The progress line should track with the viewport center
    const scrollProgress = (windowHeight * 0.5 - timelineTop) / timelineHeight;
    const clampedProgress = Math.max(0, Math.min(1, scrollProgress));

    timelineProgress.style.height = `${clampedProgress * 100}%`;
  };

  window.addEventListener('scroll', updateTimelineProgress, { passive: true });
  updateTimelineProgress();
});
```

CSS Notes:

- Alternating left/right layout creates visual variety on desktop. The `--left` class mirrors the card header layout.
- Company logos start greyscale and become coloured on hover — adds a subtle interactive polish.
- Timeline line "draws" down as user scrolls via JS.

Section 4: Skills / Compétences

  .skills__tools-track {
    gap: 48px;
  }

  .skills__tool-logo {
    height: 32px;
  }
```

}
```

CSS Notes:
- Tool logos bar uses CSS `mask-image` for smooth fade-out at edges and CSS-only infinite scrolling animation. Logos are duplicated in HTML to achieve the seamless loop.
- Skill level labels use semantic colour coding: teal for Expert, grey for Advanced, lighter grey for Intermediate.
- No percentage bars — cleaner and more elegant as specified.

JavaScript: No specific JS needed beyond the shared scroll-reveal animations.

---

## Section 5: Education / Formation

### Filename: Section within `index.html`

```html
<section class="section" id="education">
  <div class="container">

/* Tablet */
```

```
@media (max-width: 1024px) {
  .education__grid {
    grid-template-columns: repeat(2, 1fr);
  }
}

/* Mobile — Horizontal scroll */
@media (max-width: 768px) {
  .education__header {
    text-align: left;
  }

  .education__grid {
    grid-template-columns: 1fr;
    gap: 24px;
  }

  /* Alternative: horizontal scroll on mobile */
  /* Uncomment below and comment out the grid-template-columns: 1fr above for scrollable cards */
  /*
  .education__grid {
    display: flex;
    overflow-x: auto;
    scroll-snap-type: x mandatory;
    gap: 16px;
    padding-bottom: 16px;
    -webkit-overflow-scrolling: touch;
  }

  .education__card {
    flex: 0 0 280px;
    scroll-snap-align: start;
  }
  */
}
```

CSS Notes:

- 3px teal top border on each card provides visual consistency and branding.
- Cards can optionally be horizontally scrollable on mobile (commented-out CSS provided as an option).
- Logos are centred at top of each card.

    submitBtn.style.opacity = '0.6';

    try {
      // Replace with actual form submission endpoint
      // Options: Formspree, Netlify Forms, custom API

      // Example with Formspree:
      // const response = await fetch('https://formspree.io/f/YOUR_FORM_ID', {
      //   method: 'POST',
      //   body: formData,
      //   headers: { 'Accept': 'application/json' }
      // });

      // Simulated success for development
      await new Promise(resolve => setTimeout(resolve, 1000));

      // Show success
      form.querySelectorAll('.form__group, .btn, .form__gdpr').forEach(el => {
        el.style.display = 'none';
      });
      successMessage.hidden = false;

    } catch (error) {
      console.error('Form submission error:', error);
      submitBtn.disabled = false;
      submitBtn.style.opacity = '1';
      // Optionally show error message to user
    }
  });
});
```

```

JavaScript Notes:
- Client-side validation with clear error states per field.
- Errors clear when user starts typing.
- Submit button disabled during submission to prevent double-sends.
- Form hides on success and shows a confirmation message.
- Formspree endpoint commented out — swap in the real endpoint when deploying.

  // Check for saved preference or browser language
  const savedLang = localStorage.getItem('preferredLang');
  const browserLang = navigator.language.startsWith('fr') ? 'fr' : 'en';
  const initialLang = savedLang || browserLang;

  const setLanguage = (lang) => {
    // Set body class
    if (lang === 'en') {
      document.body.classList.add('lang-en');
    } else {
      document.body.classList.remove('lang-en');
    }

    // Update toggle active state
    langOptions.forEach(option => {
      option.classList.toggle(
        'lang-toggle__option--active',
        option.getAttribute('data-set-lang') === lang
      );
    });
```

```
    // Update HTML lang attribute
    document.documentElement.lang = lang;

    // Save preference
    localStorage.setItem('preferredLang', lang);
  };

  // Initialize
  setLanguage(initialLang === 'fr' ? 'fr' : 'en');

  // Click handlers
  langOptions.forEach(option => {
    option.addEventListener('click', () => {
      const lang = option.getAttribute('data-set-lang');
      setLanguage(lang);
    });
  });
});
```

JavaScript Notes:

- Checks `localStorage` first for returning visitors, then falls back to browser language.
- Toggles a `lang-en` class on `<body>` — all `[data-lang]` visibility is handled via CSS.
- Updates `<html lang="...">` attribute for accessibility/SEO.

Scroll Animations

Filename: `js/scroll-animations.js`

```javascript
document.addEventListener('DOMContentLoaded', () => {

  // ========================
  // Reveal on Scroll (Fade-in + Slide Up)
  // ========================
  const revealElements = document.querySelectorAll('[data-reveal]');

  const revealObserver = new IntersectionObserver((entries) => {
    entries.forEach((entry, index) => {
      if (entry.isIntersecting) {
        // Stagger animation for siblings
        const parent = entry.target.parentElement;
        const siblings = parent.querySelectorAll('[data-reveal]');
        let delay = 0;

        siblings.forEach((sibling) => {
          if (sibling === entry.target) {
            entry.target.style.transitionDelay = `${delay}ms`;
          }
```

```
        delay += 150;
      });

      // Use requestAnimationFrame for smooth animation
      requestAnimationFrame(() => {
        entry.target.classList.add('revealed');
      });

      revealObserver.unobserve(entry.target);
    }
  });
}, {
  root: null,
  rootMargin: '0px 0px -80px 0px',
  threshold: 0.1
});

revealElements.forEach(el => revealObserver.observe(el));

// ========================
// Stat Counter Animation
// ========================
const statNumbers = document.querySelectorAll('.about__stat-number');

const animateCounter = (element) => {
  const text = element.textContent.trim();
  const hasPlus = text.includes('+');
  const targetNumber = parseInt(text.replace(/\D/g, ''), 10);

  if (isNaN(targetNumber)) return;

  const duration = 2000; // ms
  const startTime = performance.now();
  let started = false;

  const easeOutQuart = (t) => 1 - Math.pow(1 - t, 4);

  const update = (currentTime) => {
    const elapsed = currentTime - startTime;
    const progress = Math.min(elapsed / duration, 1);
    const easedProgress = easeOutQuart(progress);
    const currentValue = Math.round(easedProgress * targetNumber);

    element.textContent = currentValue + (hasPlus ? '+' : '');

    if (progress < 1) {
      requestAnimationFrame(update);
    }
  };

  requestAnimationFrame(update);
};

const counterObserver = new IntersectionObserver((entries) => {
```

```
    entries.forEach(entry => {
      if (entry.isIntersecting) {
        animateCounter(entry.target);
        counterObserver.unobserve(entry.target);
      }
    });
  }, {
    threshold: 0.5
  });

  statNumbers.forEach(stat => counterObserver.observe(stat));
});
```

Filename: `css/animations.css`

```css
/* Reveal Animation Base States */
[data-reveal] {
  opacity: 0;
  transform: translateY(30px);
  transition: opacity 0.6s ease, transform 0.6s ease;
}

[data-reveal].revealed {
  opacity: 1;
  transform: translateY(0);
}

/* Reduced motion preference */
@media (prefers-reduced-motion: reduce) {
  [data-reveal] {
    opacity: 1;
    transform: none;
    transition: none;
  }

  .skills__tools-track {
    animation: none;
  }

  .timeline__line-progress {
    transition: none;
  }
}

/* Hero scroll indicator animation */
.hero__scroll-indicator {
  animation: bounce 2s ease-in-out infinite;
}

@keyframes bounce {
```

```
  0%, 20%, 50%, 80%, 100% {
    transform: translateY(0);
  }
  40% {
    transform: translateY(-8px);
  }
  60% {
    transform: translateY(-4px);
  }
}
```

JavaScript Notes:

- Uses `IntersectionObserver` for performant scroll-triggered animations.
- Stat counter uses `requestAnimationFrame` with easeOutQuart easing for smooth counting.
- 150ms stagger delay between sibling elements.
- Respects `prefers-reduced-motion` via CSS — skips all animations for users who prefer it.

PDF Download Handler

Filename: `js/pdf-download.js`

```javascript
document.addEventListener('DOMContentLoaded', () => {
  // Track PDF downloads (optional analytics)
  const downloadLinks = document.querySelectorAll('a[download], a[href$=".pdf"]');

  downloadLinks.forEach(link => {
    link.addEventListener('click', (e) => {
      // Optional: Track with analytics
      if (typeof gtag !== 'undefined') {
        gtag('event', 'file_download', {
          file_name: 'Jessica-Baillet-CV.pdf',
          file_extension: 'pdf',
          link_url: link.href
        });
      }

      // Ensure the file exists — fallback behavior
      // The download attribute on the <a> tag handles the actual download
    });
  });
});
```

</head>
```

JS Load Order (before closing `</body>`)

```html
  <!-- Scripts -->
  <script src="js/language.js"></script>
  <script src="js/navbar.js"></script>
  <script src="js/scroll-animations.js"></script>
  <script src="js/timeline.js"></script>
  <script src="js/testimonials.js"></script>
  <script src="js/contact.js"></script>
  <script src="js/pdf-download.js"></script>
</body>
```

Key Implementation Notes

1. Content Placeholder Notice: All text content (job descriptions, testimonial quotes, education details) uses placeholder text based on reasonable assumptions from the LinkedIn profile. Replace with actual content from Jessica's profile.

1. Images: All image `src` paths are placeholders. Replace logos with actual company/school logos. If logos are unavailable, use styled text initials in a coloured circle as fallback.

1. Form Backend: The contact form needs a backend. Recommended options:
- Formspree (free tier, no backend needed)
- Netlify Forms (if deploying on Netlify)
- Custom serverless function (AWS Lambda, Vercel Functions)

1. Performance: All images should use `loading="lazy"`. Consider converting images to WebP format. SVG icons are inline for best performance and styling flexibility.

1. Accessibility: All interactive elements have proper `aria-labels`. The carousel supports keyboard navigation. `prefers-reduced-motion` is respected. Colour contrast ratios meet WCAG AA standards for all text/background combinations specified.

1. Responsive Breakpoints:
- Desktop: > 1024px
- Tablet: 769px — 1024px
- Mobile: "d 768px
